

AI Bootcamp

Cohort 1

STARTS

Mon 12 October 2026

LIVE SESSIONS

Saturdays, 11am WAT

FORMAT

6 weeks + final project

COHORT SIZE

35 seats

Who it is for

-
- 01 **Students and graduates** who want skills employers are hiring for now.
 - 02 **Career changers** looking for a practical way into tech.
 - 03 **Marketers, founders and freelancers** who want AI doing real work for them.
 - 04 **Anyone done with tutorials** who wants to build.
-

WHAT YOU NEED

A laptop, a Claude Pro plan (\$20 a month) and time to build every week. No coding experience needed.

What you walk away with

7

Projects shipped: one every week, plus a final project

1

Live product on the internet, with an AI agent running it

20+

Tools set up and used for real work

1

Certificate, earned only by completing all of the work

Use AI better than most people

You will use Claude and ChatGPT far beyond the average user: with context, workflows and skills.

How each week works

01

Lessons

Short video lessons, each with a full written version, so you can learn on your phone and build at your laptop.

02

Live session, Saturdays 11am WAT

Walkthroughs, questions answered and builds reviewed live, every week.

03

Assignment

A practical task on the week's lessons.

04

Weekly test

Ten questions. 80% to pass.

05

Weekly project

Submitted every week and reviewed.

06

Your pod

A small group from your cohort to build alongside, so nobody gets stuck alone.

The roadmap

WEEK 0 · BEFORE
YOU START

Get set up

Laptop check, accounts ready, meet your pod, and set your goal for the six weeks.

ARC 1 · WEEKS 1
AND 2

Your AI foundation

A working AI setup, and prompting that gets you the results you want.

ARC 2 · WEEKS 3
AND 4

Build and create

A live website or web app, and professional AI-generated videos that companies and individuals will pay you for.

ARC 3 · WEEKS 5
AND 6

Automate and earn

AI agents and automations working for you, and a career or business plan built on them.

DEMO DAY · END OF
WEEK 6

Launch one real thing

Present your final project live, then get certified.

ARC 1 · WEEKS 1 AND 2

Your AI foundation

WEEK 1

Set up your AI stack and use it properly

What AI actually is, and why it gives the answers it does

Claude, ChatGPT and Gemini: what each one is best at

Your builder setup: Claude Code, GitHub, Supabase and Vercel

How agents work: CLAUDE.md, context and skills

Claude · Claude Code · ChatGPT · Codex · Gemini · GitHub · Supabase · Vercel

YOU SHIP

Your AI workspace: a Claude Project that knows you, your first skill, and a one-page site live on the internet.

WEEK 2

Prompt engineering: writing and marketing with AI

How to prompt any AI model: context, roles and constraints

Teaching AI your voice, so the writing sounds like you

Prompts for everyday work: posts, emails, proposals and captions

Prompts for marketing: offers, landing pages and launch copy

Claude · ChatGPT · Skills

YOU SHIP

Your own prompt library and voice skill, and published writing in your voice.

ARC 2 · WEEKS 3 AND 4

Build and create

WEEK 3

Build websites and web apps

How a web app works

Getting AI to plan before it writes a single line of code

Adding a database and sign-in, then putting it live

Making it work on all devices, and monitoring it with cybersecurity best practices

Claude Code · Supabase · Vercel · v0 · Lovable

YOU SHIP

A live website or web app that works on all devices.

WEEK 4

Video, UGC and motion graphics with AI

Realistic AI video, and which tool is best for what

UGC-style ads

AI voice, avatars and motion graphics

Editing videos using agents

Veo · Kling · Higgsfield · ElevenLabs · Remotion · CapCut

YOU SHIP

A UGC-style ad and a motion graphic that launch your week 3 product.

ARC 3 · WEEKS 5 AND 6

Automate and earn

WEEK 5

Agents and automation

Giving agents tools, with your approval before anything goes live

Building agents without code, and in the Claude console

A chatbot on your website, and your own AI operating system

Automations that run on their own, and the tools companies use

Claude console · Google Opal · n8n · Zapier · Make

YOU SHIP

An AI chatbot live on your site, and an automation doing real work for it.

WEEK 6

Identify your career, industry and business

Choose your path: AI automation specialist, AI UGC ad creator, AI copywriter, AI web product builder or AI product marketer

Your CV and LinkedIn, rebuilt around what you built

Finding and applying for jobs with AI

Building a business: offer, pricing and first clients

Claude · ChatGPT · LinkedIn

YOU SHIP

A live offer with outreach sent, or three tailored job applications.

Final project and demo day

01

ARC 1

Your prompts, voice and copy

02

ARC 2

Your live product and AI videos

03

ARC 3

Your AI agent and automations

CERTIFICATION

To get certified

- ✓ All six weekly projects approved
- ✓ Every assignment handed in
- ✓ All six weekly tests passed
- ✓ Final project approved and presented

Every certificate has a public verification link, so anyone can check it is real.

Career paths

AI Automation Specialist

Builds workflows that save a business hours every week.

WEEKS 1 · 5

AI UGC Ad Creator

Makes AI video ads for brands and businesses.

WEEKS 2 · 4

AI Copywriter

Writes posts, pages and campaigns with AI, in the client's voice.

WEEK 2

AI Web Product Builder

Ships websites and web apps for clients.

WEEKS 1 · 3

AI Product Marketer

Launches products with AI copy, video and automation.

WEEKS 2 · 4 · 5

AI Agent Builder

Sets up chatbots and agents for support and sales.

WEEK 5

Or build your own business

Package what you built into an offer, price it, and find your first clients. Week 6 walks you through it.

No bootcamp can promise you a job. This one makes sure you have the work to show for it.

Where the demand is

INDUSTRY	WHAT IS CHANGING	WHO IS NEEDED
Marketing and media	Content, ads and video made in hours.	People who can direct AI and keep the quality high.
Customer service	AI agents answer the first line of questions.	People who can build and manage them.
Operations and admin	Data entry, scheduling and reporting are being automated.	People who can design those workflows.
Finance and accounting	Bookkeeping and routine checks are going automatic.	People who can set it up and check the output.
Legal and professional services	Research and first drafts take a fraction of the time.	People who know where AI helps and where it fails.
Small businesses	Owners want websites, content and automation, without a big team.	Freelancers who can deliver all three.

What comes after

01 **A portfolio of seven projects**

Real work you can link to in job applications, pitches and your LinkedIn.

02 **A verifiable certificate**

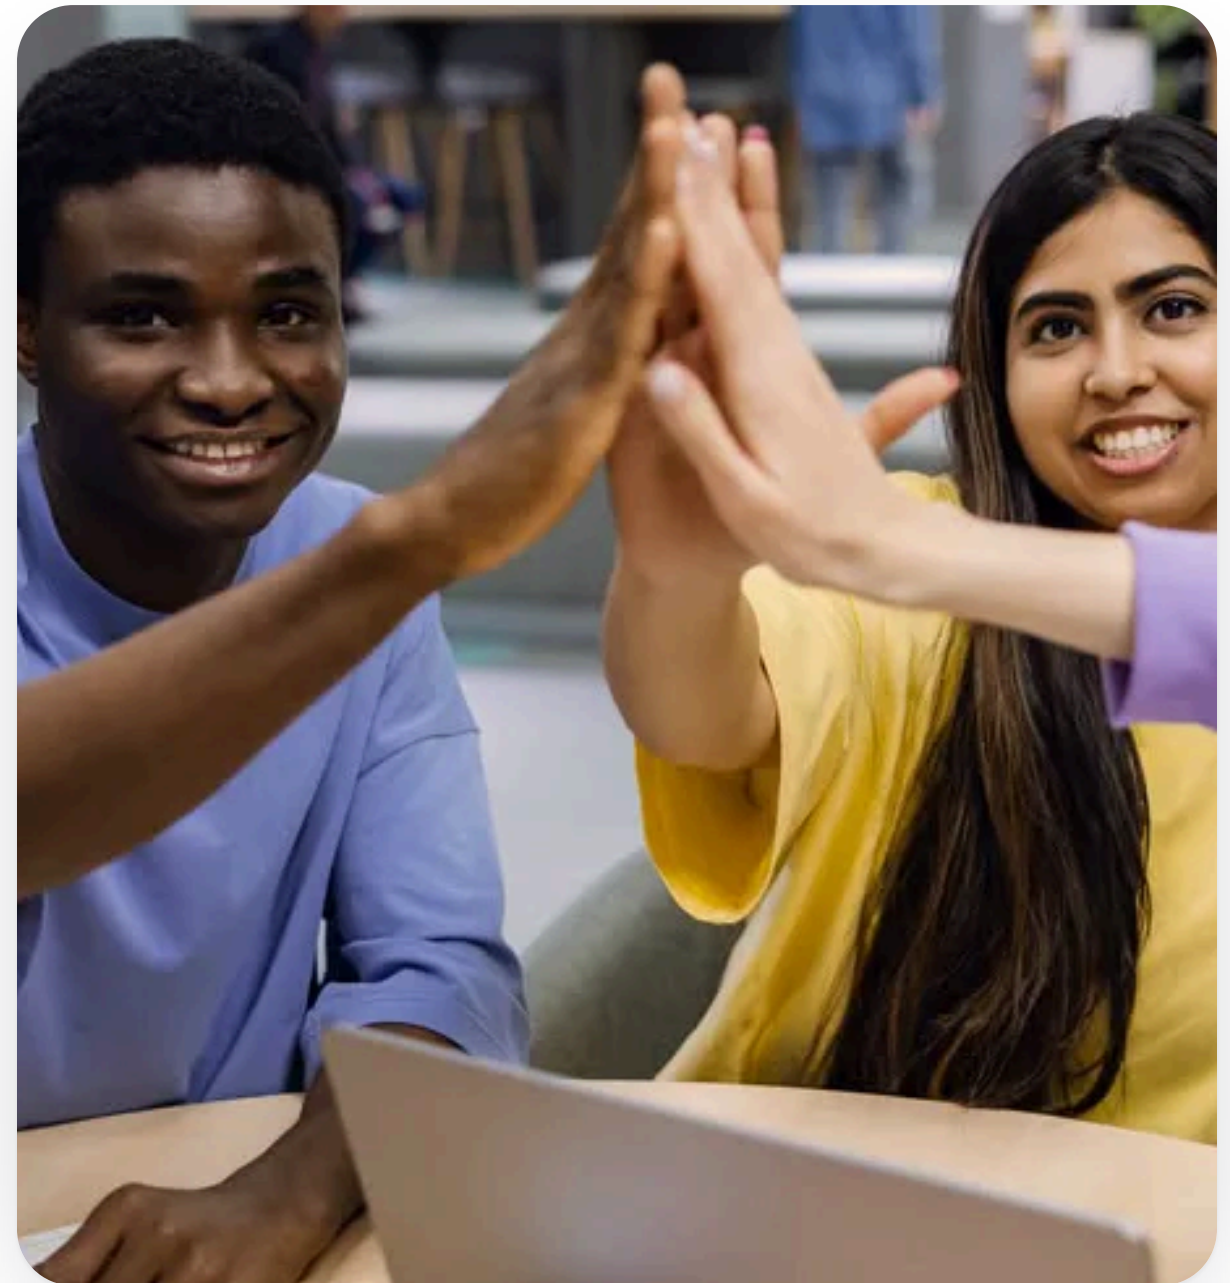

Proof you did the work, checkable by anyone with one link.

03 **The Learnhub community**

Your cohort and pod stay together after demo day.

04 **Going further**

1:1 mentorship for graduates who want more time and deeper builds.

Your investment

EARLY-BIRD · UNTIL SAT 10 OCTOBER

~~₦~~**150,000**

~~₦350,000~~

Pay in full before Saturday 10 October and save ₦200,000.

FULL PRICE

₦350,000

From Sunday 11 October, paid in full.

PAYMENT PLAN

₦200,000 + ₦150,000

Second payment due before week three.

INCLUDED

- ✓ All six weeks of lessons, video and written
- ✓ A live session every Saturday
- ✓ Review and feedback on every project
- ✓ Your pod and the cohort community
- ✓ Demo day and your verifiable certificate

Not included: your laptop and a Claude Pro plan (\$20 a month). Other tools are taught on their free tiers first.

35 SEATS IN COHORT 1.

Questions

Do I need to know how to code?

No. You will build websites and apps by directing AI, and every step is taught from zero.

Do I need a laptop?

Yes. Lessons read well on a phone, but the building happens on a laptop.

What if I miss a Saturday session?

Sessions are recorded, so you can catch up the same week.

What if I fall behind?

Your pod and the live sessions are there for exactly that. Tests can be retaken as many times as you need.
